

MOTOR VEHICLE ACCIDENT ASSESSMENTS AND TREATMENT

Motor Vehicle Accident Assessments are typically requested by a lawyer and ask for specific information about the client's functioning.

They involve the administration of a clinical interview, along with standardised measures to assess the impact of the accident on the client's psychological functioning.

Treatment is also available for accident related conditions such as anxiety, depression and post-traumatic stress disorder (PTSD).

Clients are generally referred for treatment by their GP. Clients need a valid Allianz claim number in order to be able to access treatment.
