

AUTISM SPECTRUM DISORDER ASSESSMENTS

Karen Davies is a recognised diagnostician with Autism SA for Autism Spectrum Disorders in Children and Adults.

An Autism assessment typically involves: -

- An initial interview with the parent or family member.
- A detailed history taking documenting developmental history and areas of concern.
- An individual session with Karen and the child/adult
- Where applicable, a visit to observe the child/adult in another context e.g. school, workplace.
- A comprehensive written report which details developmental history, observations, the diagnostic criteria for ASD and whether these are met.

Cost of this assessment is \$750.

In order for a diagnosis to be verified the child/adult needs to have a second assessment by a diagnostician from a different discipline (names can be provided).

Karen also offers a one off consultation with parents/adults to give an opinion about whether a full autism assessment is warranted.
